## Skills

Adobe InDesign  
Adobe Photoshop  
Adobe Illustrator  
WordPress  
HTML/CSS  
PHP/MySQL  
Nikon Cameras/Equipment  
Layout  
Branding and Marketing  
Pricing and Invoicing  
Project Management  
Customer Service

I started my path toward professional graphic design during high school, continued at UVU (formerly UVSC) and later at Snow College, with a range of multimedia, art, design and core classes. I have since learned that to be successful you must be constantly learning and not afraid to try something new. I use industry standard products and practices, and can work on Mac or PC.

### 2015 – Current Dallas Price Graphic Design

Dallas Price Graphic Design was founded in 2017. I had been working for years as just an individual, after some fair growth in 2016, I decided to dive in head first. I enjoy communicating visually; fantastic typography, photography, video and even my silly illustrations. My responsibilities include print and web product design, photography, and development of web solutions, as well as the difficulties of running a business.

### 2012 – 2015 The Richfield Reaper

As a Graphic Designer at The Richfield Reaper I was responsible for building award winning advertisements for various clients, building pages, and the yearly "Best of the Best" online ballot.

### 2011 – 2012 Maverik Inc.

An Adventure Guide at Maverik has many responsibilities. As you can imagine, it was always an adventure. Through this and my other various professional endeavors I have gained great customer service skills.

### 2010 – 2011 Price PC Repair

Owner/Technician presented me with great opportunities. I received a computer repair certificate while still in High School and have been working on computers since.
